

GHG saves JES Tech hours of work and thousands of dollars!

GHG automates time and attendance, and employee management while providing seamless integration with existing QuickBooks accounts

“Based on the low cost of ownership and the return on investment, I don’t understand why every organization can benefit from the software. I have been so impressed with the software that I recommend it to virtually every organization I talk to.”

Bobbie Jessie

SUCCESS STORY

GHG Corporation

AT A GLANCE:

Customer:

JES Tech

Location:

Houston, Texas

Industry:

Government and Staffing

Business Challenge:

JES Tech needed to automate their business practices, including time and attendance, integrate with QuickBooks, and enforce DCAA regulations.

Solution:

Implement GHG’s eEMS products including time and attendance, online pay stubs, HR, and Recruiting/Staffing.

Results:

JES Tech saves time and money, while ensuring corporate and DCAA guidelines are being met.

Customer Profile

JES Tech is a Houston, Texas based Project Management and Staffing Services company. Industries supported by JES Tech include aerospace, health-care, academia, government, telecommunications, and commercial labor. As a SBA certified 8(a) and HUBZone company, JES Tech is uniquely positioned to provide outstanding services while helping industry support their goals of minority business participation.

Business Challenge

JES Tech’s business processes were largely paper-based with the exception of accounting. Wanting to position their business for profitable growth, JES Tech searched relentlessly for a Web-based, integrated business automation solution that would function seamlessly with their existing QuickBooks account system. After years of searching for a cost-effective solution, JES Tech discovered GHG Corporation and electronic Employee Management Solution (eEMS). Suddenly the answer was obvious, and the decision to go with the eEMS suite of products was made within one month’s time.

Solution Overview

GHG's electronic Employee Management Suite (eEMS) is an ERP system that eliminates the paper trail method of accessing critical employee records, and provides instantaneous online retrieval of resumes , time sheets , leave balances , pay stubs , benefits and employee reviews. eEMS is an integrated set of secure Web-based, database driven employee management tools that automate time sheet collection , pay stub distribution , human resource management , and recruiting and staffing . For you, this means reduced administrative and management costs, increased data accuracy and improved management control.

Business Benefits

The implementation of eEMS within JES Tech provided four primary benefits:

- Saved Time and Money
- Improved Data Quality
- Ensure Corporate Business Practices were adhered to on a daily basis
- Enable DCAA Compliance for Time and Attendance

GHG Corporation's Employee Management Suite (eEMS) which includes:

electronic Time Sheet Management Solution

(eTSMS): Provides a secure, password-protected system for tracking and management of employees' time by project, department, customer or other user defined category, available to employees and managers anywhere, anytime, from Internet-enabled computers.

electronic Pay Stub Solution (ePSS): A secure, easy-to-use Web-based tool that empowers employees to view their current and/or past pay stubs as needed, from Internet-enabled computers.

electronic Recruiting and Staffing Management Solution (eRSMS):

Automates the recruiting and staffing process by providing a central repository for all vital recruiting data, and by facilitating quick and easy posting of job openings to both internal and external Web-sites resulting in shortened hiring cycles.

electronic Human Resource Management Solution (eHRMS):

A secure Web-based, database driven solution that centralizes vital employee data including compensation, benefits, contract histories, and security clearance status which results in improved data accuracy, better management oversight, and reduced administrative costs.

GHG's Installation, Customization and Training Services:

GHG's technical experts worked with JES Tech to integrate and customize eEMS to meet their specific requirements

Return on Investment (ROI)

End-to-End Process Automation

By implementing eEMS, JES Tech has integrated its business processes, and consolidated vital organizational data into a centralized data repository that is easily queried and maintained. JES Tech will leverage these new systems to support its anticipated business growth, without experiencing a corresponding increase in administrative and accounting staff, thereby achieving the desired economies of scale.

➤ **Affordable, Scaleable, Easy-to-use Solution**

JES Tech deployed eEMS in a Microsoft® Window 2000 operating environment running on an Intel platform. GHG's commitment to platform independence provided JES Tech the opportunity to select their computing infrastructure, and help ensure smooth migrations to new software releases.

Ease-of-use was an important factor to the success of eEMS within JES Tech. "eEMS is intuitive and easy-to-use. Drop-down menus and consistent user interfaces shorten ramp-up time and minimize training requirements. Employees, supervisors, project managers and accounting have all commented on how eEMS has had a positive impact by improving both the efficiency and accuracy of their business operations." states Mr. Sabin of JES Tech.

"Implementing GHG's eEMS product suite has helped position JES Tech for growth. Integrating our timesheet software into our financial system has enabled us to streamline our business processes resulting in reduced operating costs."
