### AT A GLANCE:

**Customer:**

IM Brewer & Associates, Inc

**Location:**

Denver, CO

**Industry:**

General Contractor/  
Construction Services

**Business Challenge:**

A solution to adequately manage various construction projects and all the paperwork that is required.

**Solution:**

Quantum Project Manager & QuickBooks Premier- Contractors Edition

**Results:**

The combination of the Quantum Project Manager and QuickBooks has helped raise their bottom line by 38%!

### Business Challenge

IM Brewer & Associates, Inc was looking for a business solution to adequately manage various construction projects and the documentation that is required.

In the construction industry there are many forms, such as AIA\* billing forms, Certified Payroll Reports, and Contract Documents, that all have to be completed and submitted in a timely manner. It would take hours each week to complete and double-check them to make sure there were no errors.

They previously tried several different estimating software packages that were too cumbersome. They wanted something that could streamline the creation and management of the reports, yet still be user friendly.

### Solution Overview

IM Brewer & Associates, Inc had been using QuickBooks Premier-Contractors Edition for their accounting software, so they were looking for something that would integrate with QuickBooks.

When they reviewed the Quantum Project Manager, they realized that it was the perfect match. While QuickBooks would take care of the financial aspects of the business, the Quantum Project Manager would handle all of the other reports and documents needed for construction projects.

The Quantum Project Manager handles their AIA\* Billings, Certified Payroll Reports, Transmittals, Proposals and so much more. With the integration with QuickBooks, the program makes it fast and accurate to produce all of their reports.
