Tom Curren Companies

Location:

Auburndale, MA

Industry:

Remodeler

Business Challenge:

Tom Curren Companies needed to increase their productivity in their office. The Remodelers' goals were find scheduling software that would integrate with QuickBooks, eliminating the duplication process of entering things twice.

Solution:

VirtualBoss Scheduling Software and QuickBooks: Premier Contractor Edition 2006

Business Benefits:

- Together QuickBooks and VirtualBoss allow Tom Curren Companies to:
- Save 2 hours a week
 - Reduce data entry
 - Increase efficiency

Customer Profile

Tom Curren Companies have become accustomed to conveniences that come with having scheduling software. They are now more organized with their jobs and know where any one project is by a click of a button.

Business Challenge

Tom Curren Companies were in search of a scheduling program that would help the company automate their scheduling system but also integrate with QuickBooks; allowing them to eliminate errors and duplicate efforts, while making them more efficient when it came to processing jobs and communicating information.

Solution Overview

After looking at several project management software programs, Tom Curren Companies chose VirtualBoss specifically for their ability to integrate with QuickBooks. "We found VirtualBoss, realized it linked with QuickBooks, and we knew we had something good." She says "Knowing that we no longer have to enter important information twice was huge...no more inconsistencies, and errors, everything would be streamlined, we were extremely excited about this find!"

Business Benefits

With both programs in the company's daily routine, the remodeler is much more organized, says Morin. "We waste less time entering the information and fixing our mistakes, and are able to concentrate on making sure workers stay on schedule and our customers are satisfied.

SUCCESS STORY

VirtualBoss' scheduling features helped Tom Curren Companies effectively schedule, plan and manage job schedules. Before introducing the scheduling software, Tom Curren Companies was keeping track of their jobs on a tack board. Now they are able give their workers work order with their specific task information so they know where they need to be and what they need to do to make sure the job is done correctly.

Response from the workers has been outstanding. "They like being able to receive a Gantt chart of their schedule, instead of trying to keep tracks of it in their head. It helps us stay more organized as well, because we know where everyone is at on a particular day, instead of having to call everyone to find out," says Morin.

"The biggest plus about VirtualBoss is its ability to integrate with QuickBooks. It's been a huge relief knowing we don't have to wonder if the record was added in both programs. I enter it in one, sync, and I see it in the other program. It's been a great time saver...saving us at least two hours a week, which is huge considering now I can spend that time doing other things," says Morin

The success of VirtualBoss at Tom Curren Companies has given Morin a reason to believe that they will continue down this path for awhile. "VirtualBoss' integration with QuickBooks allows for us to effectively schedule, plan, and manage job schedules while knowing that all of our important information is up to date. Our customers and our team are benefiting from these capabilities."

"QuickBooks is key, for running our business, but now with VirtualBoss we are able to keep everything organized and eliminates the double entry part of the job saving us time and money."
