

Web-based Access to your QuickBooks Data

MC2 Anywhere's online solutions helped a growing company concentrate on growing while keeping costs low.

"We have a large amount of staff in the field; using MC2 eliminated the payday hassle of collecting time and expense information from them."

Tracy Richardson
CTO
Wireless Vision, Inc

SUCCESS STORY

Wireless Vision, Inc.

AT A GLANCE:

Customer:

Wireless Vision, Inc.

Location:

Marietta, GA

Industry:

Field Services

Business Challenge:

Wireless Vision needed to gather time and expense information from employees and contractors who never come into the office.

Solution:

MC2 Anywhere plus QuickBooks, perfect match.

Results:

With MC2, WVI:

- Quickly and accurately collects time and expenses.
- Reduces time spent recording time and expenses by 90%.
- Employees can record their information anytime from a web based browser.

Customer Profile

Wireless Vision delivers solutions based on Digital Pen and Paper technology, bringing together freehand writing and note-taking with state-of-the-art digital technology. The technology immediately transfers information electronically as it is being put on paper.

Wireless Vision's digital pen and paper solutions allow businesses to integrate paper-based processes with digital information systems without disrupting their existing, time-proven procedures.

Business Challenge

Wireless Vision needed to gather time and expense information from employees and contractors who never come into the office.

WVI and its administrative staff were spending a large portion of their days manually transferring hours and expenses recorded in spreadsheets using data from phone calls, faxes and emails into QuickBooks. With all of their employees working remotely, they needed a solution that could be used anytime and anywhere.

Solution Overview

After researching its options, WVI chose Anywhere Time and Expense from MC2 Anywhere. MC2's online time and expense module works directly with QuickBooks. Employees and Vendors can enter time and expense information from anywhere they have Internet access. The online information flows seamlessly into QuickBooks without extra effort.

Tracy Richardson, CTO at WVI, says "We selected MC2 because of its tight integration with QuickBooks, which equates to no extra workload for us, data flows back and forth with ease".

Business Benefits

MC2 frees up much needed time which allows WVI to concentrate on their customers rather than trying to keep their own in house record keeping.

With MC2, everything is familiar when it comes to what has to be done because most of the system is modeled after QuickBooks data entry screens, so WVI didn't have to re-learn new terminology or a whole new system.

SUCCESS STORY

Wireless Vision

All information that is used by QuickBooks for tracking time and expenses is also the same information that MC2 uses, in fact, MC2 was designed from the ground up to work with and only with QuickBooks, so WVI only sees what it is used to seeing. Information flows seamlessly between the two systems without having to remap data back and forth.

MC2 Provides many extra features that is not available in QuickBooks or many other online solutions that enables WVI capture time and expenses more effectively.

WVI first setup groups in MC2 which enabled them to define what lists such as Customer or Service Item an employee has access to. These groups drastically cut down on timesheet errors because an employee can only enter what they can see in the lists, so no more errors with the wrong item being selected.

WVI also uses a 2 level approval process for timesheets. Timesheets must be approved by a manager and a person in the accounting department before it flows into QuickBooks.

MC2's automated email reminders are used to send emails to employees who have not submitted time and to managers who need to approve time. "The accounting department and managers love the 'Time Status' display", says Tracy, "On one screen they can

See the status of everyone's time. If it's been entered, submitted or approved. And with one click of a button the can send nag emails to submit time to everyone who hasn't".

Tracy says "Our managers were in revolt for us to get a better system to track time and expenses. Double entering timesheets that were emailed and faxed to us into QuickBooks was getting out of hand. We spent a lot of time evaluating different solutions and we went with MC2 because no other program is comparable, that's for sure!"

"Getting information from employees in the field is our business and MC2 helps us run our business more effectively."
